

Day first. 1.04.2016, Friday

Welcome words 8.30-8.45

1. Welcome greetings.

Key-note lecture:

Past, present and future in Breast Cancer. (Zurrída)

Breast conserving surgery. **9.15-11.30**

Chairmen: Zhygulín, Andree

2. What predicts the local recurrence these days? (Kolacinska)
3. Principals of choice of BCS techniques for breast preservation in different tumor's locations. German approach. (Rezai)
4. BCS: How to plan the best reshape. Italian Approach. (Nava)
5. Benign lesions of the breast: oncological and surgical aspects. (Krupa)
6. Clinical cases with expert discussions. (Zhygulín)
7. Discussions.

Coffee break. 11.30-12.00

Reconstructive surgery of the breast. Implants.

12.00-14.00 Chairmen: Rezai, Cheshuk

1. How to Maximize Aesthetic Outcome in Implant Based Breast Reconstruction. (Nava)
2. Skin-reducing mastectomies. Different types and approaches according to the tumor location. (Zhygulín)
3. Delayed expander/implant reconstruction. (Khrapach)
4. Contralateral mastectomy. Who really needs it? (Unukovych)
5. Lipografting in breast reconstruction. (Petakh)
6. Discussion.

Lunch. 14.00-15.00

Reconstructive surgery of the breast. Flaps.

15.00-17.00 Chairmen: Khrapach, Krupa

7. Pedicled autologous reconstruction (LD, TRAM) – classic or the past? (Rezai)
8. The new Concept? The Immediate Delayed Autologous (IDEAL) Breast Reconstruction. (Andree)
9. Single Center Experience in microsurgical breast reconstruction with over 2000 flaps. (Andree)
10. How to shape a breast after mastectomy with autologous tissue. (Andree)
11. Radiotherapy and breast reconstruction – before or after? New view. (Nava)
12. Discussion.

Coffee break. 17.00-17.30

Complications **17.30-19.00**

Chairmen: Zhygulín, Kolacinska

1. Complications in BCS. (Rezai)
2. Myths and realities on breast Implant. How to minimize risks trade-offs and contamination in implant based breast surgery. (Nava)
3. Seromas after breast surgery – causes, prophylaxis and treatment. (Khrapach)
4. How often should I revise the flap after microsurgical complications? (Andree)
5. Polyacrylamide gel augmentation syndrome. Management and treatment. (Khrapach)
6. Discussion.

Welcome reception. 20.00 - 22.00

Day two, 2.04.2016, Saturday

8.00-9.00 Workshop: Symmetrized procedures in asymmetrical breasts and following breast reconstruction. (Khrapach)

Key-note lecture 9.00-9.30: The future of surgical oncology. (Audisio)

Clinical oncology. Breast cancer in young patients. Do they need more treatment? **9.30-12.00**

Chairmen: Kuten, Bernstein

1. Clinical oncology standpoint. (Siegelmann-Danieli)
2. Radiation oncology standpoint. (Geertjan van Tienhoven)
3. Surgical oncology standpoint. (Audisio)
4. Menstrual function: do we really need to suppress it? (Shparyk)
5. Molecular profiling and personalized treatment in young patients. (Kovalev)
6. Breast cancer in pregnant patients. (Siegelmann-Danieli)
7. Modern radiotherapy in breast cancer. What's new? (Geertjan van Tienhoven)
8. Discussion.

Lunch 12.00-13.00

Breast surgeon training and Breast cancer treatment in different countries. **13.00-14.10** Chairmen: Zurrída, Cheshuk

7. Breast surgeons training in Europe. (Audisio)
8. Breast cancer treatment in Poland. (Kolacinska)
9. Breast cancer treatment in Great Britain. (Krupa)
10. Breast cancer treatment in Germany. (Rezai)
11. Breast surgeon and plastic surgeon cooperation. How it works in Sweden. (Unukovich)
12. Discussion.

The experience of colleagues. Selected presentations.

14.30-16.30 Chairmen: Khrapach, Krupa

1. Immediate reconstruction of the breast with implant and mesh. (Blidaru)
2. ADM breast reconstruction in UK. (Krupa)
3. Is there still a role for pedicled TRAM flap in breast reconstruction in 2015? Long-term oncological and cosmetic results from a developing country. (Youssef)
4. Surgical approaches in central breast tumors. Single institution experience. (Cheshuk)
5. Upper-outer quadrant tumors. Different surgical approaches. Single institution experience. (Zhygulín)
6. Wise pattern in breast surgery. Single institution experience. (Silvestrov)
7. Oncoplastic and reconstructive surgery in complex treatment. Single institution experience. (Fomina)
8. Tomotherapy in complex treatment of breast cancer. (Seredina)
9. Endoscopic investigations in the intraductal breast lesions management. (Aksenov)
10. Discussion.

Coffee break. **16.30 -17.00**

Videopresentations of the surgeries.

17.00-18.30 Unukovich, Andree

1. Nipple sparing mastectomy with implant and titanium mesh reconstruction. (Rezai)
2. Skin-reducing nipple-sparing mastectomy with immediate LD-flap reconstruction. (Zhygulín)
3. Delayed expander/implant reconstruction. (Khrapach)
4. Oncoplastic lumpectomy with a local pedicled perforator flap reconstruction. (Zhygulín)
5. Discussion.

Conference closing remarks. 18.30

СОВРЕМЕННЫЕ ПОДХОДЫ В ДИАГНОСТИКЕ И ЛЕЧЕНИИ РАКА МОЛОЧНОЙ ЖЕЛЕЗЫ

День первый. 1.04.2016, пятница

Приветственное слово 8.30-8.45 15 мин

1. Welcome greetings.

Key-note лекция. 8.45-9.15

Past, present and future in Breast Cancer. (Zurrída)

Breast conserving surgery. **9.15-11.30**

Chairmen: Zhygulín, Andree

2. What predicts the local recurrence these days? (Kolacinska)
3. Principals of choice of BCS techniques for breast preservation in different tumor's locations. German approach. (Rezai)
4. BCS: How to plan the best reshape. Italian Approach. (Nava)
5. Benign lesions of the breast: oncological and surgical aspects. (Krupa)
6. Clinical cases with expert discussions. (Zhygulín)
7. Discussions.

Coffee break. 11.30-12.00

Reconstructive surgery of the breast. Implants.

12.00-14.00 Chairmen: Rezai, Cheshuk

1. How to Maximize Aesthetic Outcome in Implant Based Breast Reconstruction. (Nava)
2. Skin-reducing mastectomies. Different types and approaches according to the tumor location. (Zhygulín)
3. Delayed expander/implant reconstruction. (Khrapach)
4. Contralateral mastectomy. Who really needs it? (Unukovych)
5. Lipografting in breast reconstruction. (Petakh)
6. Discussion.

Lunch. 14.00-15.00

Reconstructive surgery of the breast. Flaps.

15.00-17.00 Chairmen: Khrapach, Krupa

7. Pedicled autologous reconstruction (LD, TRAM) – classic or the past? (Rezai)
8. The new Concept? The Immediate Delayed Autologous (IDEAL) Breast Reconstruction. (Andree)
9. Single Center Experience in microsurgical breast reconstruction with over 2000 flaps. (Andree)
10. How to shape a breast after mastectomy with autologous tissue. (Andree)
11. Radiotherapy and breast reconstruction – before or after? New view. (Nava)
12. Discussion.

Coffee break. 17.00-17.30

Complications **17.30-19.00**

Chairmen: Zhygulín, Kolacinska

1. Complications in BCS. (Rezai)
2. Myths and realities on breast Implant. How to minimize risks trade-offs and contamination in implant based breast surgery. (Nava)
3. Seromas after breast surgery – causes, prophylaxis and treatment. (Khrapach)
4. How often should I revise the flap after microsurgical complications? (Andree)
5. Polyacrylamide gel augmentation syndrome. Management and treatment. (Khrapach)
6. Discussion.

Welcome reception. 20.00 - 22.00

Day two, 2.04.2016, Saturday

8.00-9.00 Workshop: Symmetrized procedures in asymmetrical breasts and following breast reconstruction. (Khrapach)

Key-note lecture 9.00-9.30: The future of surgical oncology. (Audisio)

Clinical oncology. Breast cancer in young patients. Do they need more treatment? **9.30-12.00**

Chairmen: Kuten, Bernstein

1. Clinical oncology standpoint. (Siegelmann-Danieli)
